3. Claims 1 – 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Perkowski (US 5,950,173).

Perkowski teaches Internet based supply chain management framework (col. 11, lines 19 – 33) comprising a barcode reader 23 retrieving product related and other information from various databases 9 (col. 11, lines 34+), and allowing users to create and distribute orders and track products (col. 10, line 66 – col. 11, line 5+). The system is network and Internet based utilizing TCP/IP and other network protocols (col. 11, lines 48+). Perkowski further teaches allowing access to selected users (col. 5, lines 28 – 35) and security check for accessing/updating data (col. 19, lines 46 – 54), inherently suggesting participant(s)' identification check and verification. Further, the system is usable in retail environment (col. 1, lines 28 – 35), which can include a restaurant.
